**PRATT SAFETY SHOWER EMERGENCY GREEN LIGHT KITS**

Pratt Safety Shower Emergency Green Light Kits comply with the Australian Standard AS4775-2007 "Emergency Eye Wash and Shower Equipment".

Standards Australia AS4775-2007 "Emergency Eyewash and Shower Equipment" require the location of this equipment to be well illuminated. In most situations, the existing luminaires lighting or natural light may be sufficient.

However, in other situations additional lighting may be necessary to comply with this requirement. Whilst the colour of the lighting is not stated within the standards, it is recognised that a green luminaires light is better suited for this application as it is associated with identifying emergency equipment.

Pratt Safety Systems offer an outdoor weatherproof fluorescent light, with green light tubes in a number of kit options. These are:

**GREEN LIGHT KIT:****Model No: PSGL1**

- IP65 rated 240V AC weatherproof light housing.
- Twin 18w green fluorescent light tubes.
- Light mounting clips (located inside housing).

**GREEN LIGHT & POLE MOUNTING KIT:****Model No: PSGL2**

- IP65 rated 240V AC weatherproof light housing.
- Twin 18w green fluorescent light tubes.
- Light mounting clips (located inside housing).
- 304 stainless steel pole.
